

## PowerBoss Parts

PowerBoss Parts - The first vacuum cleaners were created during the 1860's. Luckily, floor cleaning machines and scrubbers have greatly evolved since that time. Daniel Hess made the original carpet sweeper in Iowa, USA. His version had a rotating brush together with an intricate arrangement of bellows positioned on top to produce suction. We are fortunate now that scrubber machines and vacuum cleaners require much less effort to work and are electrically driven.

### The 4 Main Types of Floor Scrubber

Now, accessible on the market are four distinct types of floor scrubbing devices. Each machine comes with their own unique features and ability to carry out particular jobs making them perfect for several market sectors and work environments. Some models are battery operated, several are compact and can be easily packed away and kept, several models are a ride-on kind. The typical model is where the worker walks behind the machine and guides it around the part which needs scrubbing. There are even floor scrubbing equipment capable of cleaning large places all on their own as they have a computer or artificial mind. These robotic models can be programmed to work without a worker.

#### 1. Fold-away Floor Scrubbers

Fold-away floor scrubbers are ideal in small businesses where space is limited. Vacuums and floor cleaning machinery have to be packed away effectively in storage areas and small cupboards. This is when the folding machine kind comes in helpful. With this particular type of floor scrubber, the main arm that is used so as to maneuver the equipment can be folded in several areas, making the machinery compact when it is not being utilized.

#### 2. Mains & Battery Operated

Even though Mains operated floor scrubbers are the most common, the battery operated model is ideal for environments where the available utility sockets are some distance away from the floor that needs scrubbing and extended power leads are not an option. The battery operated model is best suited for small areas such as washrooms with hard to reach parts that will be hard to clean with a trailing power lead. The battery could be charged and used for more or less 4 hours previous to re-charging is required. The battery could also be changed if necessary.

#### 3. Ride-on or Walking machines

One more great alternative for a floor scrubber if the area you need it for is big like warehouses and various industrial sites are the walking or ride-on scrubber machines. These machines would allow the operator to maneuver the machines all-around corners and obstructions easily and efficiently. These kinds of floor scrubbing machines come equipped with a two hundred fifty liter water tank plus one more tank to gather the filthy water. Walking devices are similar products which could be operated by somebody walking at the rear of the machine and steering the scrubber.

#### 4. Robotic Floor Scrubber devices

A robot floor scrubber can be one more choice to consider. These versions are perfect if you require a high specification floor scrubber to clean a large location that has minimal obstacles. These designs have sensors installed to allow the machine the ability to steer clear of doors, walls, stairs and humans. It can accomplish the cleaning job without problems as soon as you start the unit up and set the course, it will clean all by itself. These floor scrubbers are capable of cleaning 1000 square feet with each 4 hour charge.

### Floor Scrubbing Technology

There are different floor scrubber models presented on the market nowadays with unique features and selling points. Businesses could keep their floors clean by finding the model which best suits their needs.

To summarize, the foldable scrubber is best for accessing inaccessible and small places like for example the washrooms, while the ride-on version of floor scrubber could provide the operator with a lot more visibility and comfort. Furthermore, ride-ons are proficient at cleaning numerous hours without a charge or refill. Programmed models permit the cleaning to happen all by itself, enabling folks to accomplish tasks elsewhere. Battery operated floor scrubbers are ideal for cleaning areas away from utility sockets. These models have the additional advantage of not getting the power lead tangled under the equipment or around door frames.
