

Aerial Work Platform

Aerial Work Platforms - There are lots of accessories for forklifts that can be used to help expand the functionality of your lift truck and allow you to pick up items, handle materials with out difficulty or to finish clean-up tasks.

A few accessories were specially meant for the blades themselves. For example, blade extensions are utilized when you need a lot more fork length, that increases lifting capability. Blade extensions come in lengths ranging from 48-120 inches. Rounded or triangular attachments are another type used whenever transferring rolled material so as to make certain it does not roll off of the traditional flat blades.

Examples of lifting attachments include pivoting and telescoping crane or boom attachments. They can come in several different kinds and are usually meant for moving metal bars, lumber, poles and various types of bulky objects. Other accessories such as various styles of hook plates and hooks are accessible to carry items utilizing a sling or chain. Magnetic lifters and slab lifters are other objects that can be utilized with hook attachments. Slab lifters are specialized attachments which are designed for picking up a variety of materials which are delivered in a slab or sheet format. Carpet poles and rug rams are other lifting tools that connect to your lift truck in order to make transporting rolls of carpet easier. The attachment hooks onto the lift truck's blades and has a pole that goes through the center of the carpet roll.

There are several different types of forklift accessories which could be used for facility maintenance like for example snow blades. These forks attach to front end loaders and can transfer materials like soil, snow and dirt. Other popular cleanup attachments include magnetic sweepers and standard sweepers. Standard sweepers comprise a broom that the lift truck blades connect onto for sweeping large spaces like for example parking lots or warehouse and factory floors. The magnetic sweeper is the same except that it has a magnetic plate instead of bristles. The magnetic sweeper is utilized in areas where there is lots of metal fragments like on shop floors for instance. Sweepers have widths up to sixty inches and this surface area makes clean up easy and fast.

A material spreader is another lift truck accessory which is normally used at facilities. These spreaders are helpful for a range of applications like for example spreading rock salt, pellets, fertilizers, insecticides, seed and ice melt.

Another optional lifting attachment are work platforms. These can be utilized by numerous various companies day by day. Platforms may vary in size from 36" x 36" to up to 60" x 60". Some units may be available and are capable of folding up and storing into a smaller place. Work platforms are designed to raise staff up to an overhead location with the use of the forklift. Larger platform models have additional space for personnel to bring tools and other necessary things intended for the job. Normally work platforms are constructed of poly material or steel.
