

Toyota Forklift Part

Toyota Forklift Parts - Since 1992, Toyota Material Handling inc., U.S.A., also called TMHU, continues to be the best selling lift truck provider in the U.S. Proudly celebrating more than 40 years of service, the Irvine, California established business provides a complete line of quality lift trucks. Owing to their reputation of superiority, reliability, and sturdiness, Toyota remains prevalent in this competitive market. Quality is the foundation of Toyota's renowned Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, situated in Columbus, Indiana. The bulk of the Toyota lift trucks sold in the U.S.A are manufactured here.

All Toyota machines and parts designed within North America adhere to the International Organization for Standardization or ISO 14001 standard. The Columbus TIEM plant has been honored on many occasions for its dedication to continual progress and its environmentally friendly systems. It is the first and only manufacturer to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. For example, the Toyota 8-Series IC lift vehicles emit 70 percent less smog forming emissions than the current federal EPA standards and have complied with California's strict emission standards and regulations.

Toyota Material Handling, U.S.A. - The Industry Leader

The president of Toyota Material Handling, U.S.A., Brett Wood feels that TMHU's achievement comes from its dedication to produce high quality lift trucks while providing outstanding customer assistance and service. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues." TMHU's parent company, Toyota Industries Corporation, also known as TICO, is listed in Fortune Magazine as the world's principal lift truck provider and is amongst the magazines prestigious World's Most Admired Companies.

New Meaning to Environmental Accountability

Toyota's parent company, Toyota Industries Corporation, has imparted an excellent company values towards environmental conservancy within Toyota. Toyota's rich history of environmental protection whilst retaining economic viability can not be matched by other corporations and unquestionably no other materials handling maker can thus far rival Toyota. Environmental responsibility is a fundamental aspect of company decision making at Toyota and they are proud to be the first and only producer to provide UL-listed, EPA - and CARB -certified Compressed Natural Gas powered lift vehicles. Yet one more reason they remain a leader within the industry.

In 2006, Toyota introduced the 8-Series line. The 8-Series signifies both Toyota's innovation and leadership in the industry. It features an exclusive emission system that surpasses Federal EPA emission values, and also meets California's more involved 2010 emission standards. The finished invention is a lift vehicle that creates 70% less smog forming emissions than the current Federal standards allow.

Also starting in 2006, together with the Arbor Day Foundation, Toyota added to its dedication to the environment. To this day more than 58,000 trees have been embedded in the ground throughout state forests and neighborhood parks that were damaged by fires and other natural causes. 10,500 seedlings have also been spread through Toyota Industrial Equipment's system of sellers to non-profit organizations and local customers to help sustain communities all over the U.S.

Toyota's lift trucks offer superior stability, visibility, output, ergonomics, and all the leading safety equipment that has made Toyota an industry leader. The company's System of Active Stability, also called "SAS", helps lessen the risk of accidents and accidental injuries, and increasing productivity levels while minimizing the likelihood of product and equipment damage.

System Active Stability senses many aspects that could lead to lateral insecurity and possible lateral overturn. When any of those conditions are detected, SAS instantly engages the Swing Lock Cylinder to stabilize the rear axle. This alters the lift truck's stability trajectory from triangular in shape to rectangular, providing a major increase in stability which substantially reduces the likelihood of a mishap from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also assists to prevent injuries or accidents while adding strength.

SAS was initially introduced to the market on the 7-Series internal combustion products in 1999 and subsequently catapulted Toyota into the industry leader for safety. Since then, SAS continues to be integrated into nearly all of Toyota's internal combustion products. It is standard gear on the latest 8-Series. There are more than 100,000 SAS-equipped lift trucks in operation, exceeding 450 million hours combined. The increased population of SAS-equipped vehicles in the field, along with mandatory operator education, overturn fatalities across all models have decreased by 13.6% since 1999. Also, there has been an overall 35.5% drop in industry wide collisions, loss of control, falls and overturn from a lift truck for the same period.

Toyota's uncompromising standards extend far beyond the machinery itself. The company believes in providing extensive Operator Safety Training programs to help clients satisfy and exceed OSHA standard 1910.178. Instruction programs, video lessons and an assortment of resources, covering a broad scope of subjects-from individual safety, to OSHA regulations, to surface and cargo situations, are available through the seller network.

Ever since the sale of its first lift truck in the U.S. to the construction of its 350,000th lift vehicle produced in 2009 at Toyota Industrial Equipment Manufacturing, TMHU has sustained an unbroken existence in the U.S. This reality is demonstrated by the statistic that 99% of Toyota lift trucks bought in America at the moment are built in the United States.

TMHU is situated in Columbus Indiana and houses nearly 1 million square feet of production facilities over 126 acres of land.

Facilities include a National Customer Center, as well as production operations and distribution centers for equipment and service parts, with the total commitment exceeding \$113 million dollars.

The contemporary NCC was built to operate for TMHU buyers and sellers. The facility includes a 360-degree display room, a presentation theater complete with stadium seating for 32, an section for live merchandise demonstrations with seating capability for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's history since the birth of its originator, Sakichi Toyoda, in 1867, and finally a training center.

The NCC embodies Toyota's dedication to providing top-notch consumer service. TMHU's 68 authorized Toyota Industrial Equipment, or TIE dealers, along with 189 dealership locations all over the U.S, present the most wide-ranging and inclusive client service and support in the industry. The company's new and Licensed Used lift trucks, service, components, and financing capabilities make Toyota dealerships a one-stop shop to ensure total client satisfaction.
