

## JLG Forklift Parts

JLG Forklift Part - Following retirement in the late 1960's, John L. Grove embarked on a cross country RV expedition. After spending many years establishing his family built crane business with his brother, John had no idea that this journey would bring about the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling equipment was the end consequence of a road trip.

All through their journey, John reacquainted himself with former business associates along the way. In combination with these conversations and a noteworthy event; two workers had been unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered a substantial marketplace for a product that could quickly and safely elevate people in the air to accomplish upkeep and other building services.

Following their return from holiday, John set up a joint venture with two of his friends and bought a metal fabrication company in McConnellsburg, Pennsylvania. Starting with a small crew of twenty workers, they produced and sold their first JLG aerial work platform in 1970. The company incorporates some of the basic design essentials of that original lift into current models.

JLG lift trucks have come a ways from the time when Mr. John L. Grove came back to town from his cross-country road trip and since the initial aerial work platform debuted on the market. These days, the company proudly continues to expand itself into different markets worldwide and develops new products to ensure consumers are capable of being more effective and perform in the workplace within a safer environment.
